

3DM-Flex

Photopolymer resin for flexible parts

3DM-Flex provide high flexibility characteristics suitable for a wide range of applications which require stretch and elasticity properties. Its rubber-like properties makes the 3DM-Flex ideal for use in animation, architecture, art, education, custom jewels and toys.

Suitable for :

Animation

Architecture

Art

Education

Custom jewels

Toys

Gaskets

Your benefits :

High Flexibility

Elasticity & Stretch properties

Rubber like

RESIN PROPERTIES

Color		Red
Viscosity	@ 30°C	135 mPa.s
Density	@ 25°C	1.10 g/cm ³
Hardness (Shore A)	ISO 868	60
